Introduction

[Place here an introduction text. This should simply outlay the purpose and content of this document.]

Overview

[Place here a description of the configuration of the system, and how it is accessed. Use this section if you have more than one configuration file (or if a file has distinct sections) or if the configuration is of a complex nature. The following lists the individual files or sections. For each file or section, create a separate section tag below.]

Sections:

- [Configuration file/sectionname].

[Place here a text describing the purpose of this file or section.]

[Configuration file or section name]

[Place here a text describing the structure of this file or section.]

- [Configuration parameter name or xmlpath].

[Place here a text describing the purpose of this parameter. If there is a limited set of values, list them below.]

Values:

- [value].
[Description of the meaning of this value.]

References

Place here a list of references to other documents.
