Introduction

[Place here an introduction text. This should simply outlay the purpose and content of this document.]

Architecture

[Place here a (functional) description of the object model. If your project does not include an objectcloud, remove this section.]

Basic Concepts

[Place here a description of elementary techniques used in this project. This may also refer to external documents. Skip this section if there are no special techniques that need explanation.]

Objects

[Place here a text describing the objects and relations of interest to this project. Each separate object can be described in more detail in separate sections. Skip this section if the project does not use an

Usage. [Short description of how to use the tag]

[Additional descriptions. Use programlisting tags to list examples of usage]

Required Attributes.

[attribute name] [attribute description]

Optional Attributes.

[attribute name] [attribute description]

Required Child Nodes.

[attribute name] [attribute description]

Optional Child Nodes.

[attribute name] [attribute description]

Possible Parents.

[attribute name] [attribute description]

Example.

[example tag code]
